

“STEEL STRING”

CLEAN DRIVE

PRODUCT MANUAL

VOLUME

Adjust the output level of the effect.

FILTER

Adjusts the midrange emphasis from low-mids to the left of 12:00 and upper-mids to the right of 12:00

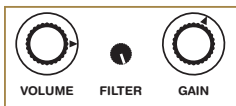

GAIN

Adjusts the amount of saturation of the signal from boost below 12:00 to overdrive (from 1:00 and beyond).

The Steel String Clean Drive faithfully recreates the tonality and feel of the iconic Dumble Steel String Singer amplifier in a stompbox format. Designed alongside a real Steel String Singer (#001), this 100% analog tone tool will do it all from Overdrive, to Fat Boost, to Compression, to EQ shaping and more. Get the unmistakable Crystal-Clear Overdrive and Fat Clean Tones from albums like "Texas Flood", "Venus Isle", and "Continuum" through any clean amp platform.
